

INTRODUCING EXPERTCARE

An easy-to-use digital solution supporting GP practices and PCNs to deliver CVD prevention QoF thresholds efficiently and consistently.

For an average of 50,000 patient 5 practice PCN

- ✓ Achieve CVD Risk QoF earnings with half the usual resources
- ✓ Automate repetitive QoF CVD prevention medicine review tasks
- ✓ Task shift from GPs to alternative prescribing clinicians with confidence
- ✓ Save 5-10 GP consultations per practice per day

The ExpertCare Model

- Your PCN selects a small team to manage all your CVD prevention QoF patients over a 12-month period. We provide the ExpertCare technology and train and support your team.
- If need be, use unused ARRS funds to buy NHS accredited pharmacists from us.

How It Works

- Patients are risk stratified for each practice and sent an SMS or called for an updated BP.
- Meds reviews are conducted using ExpertCare and, with patient permission, meds changes are made in clinical system prescribing module.

What You Can Expect

- Achievement of CVD QoF targets by satisfied and motivated PCN staff.
- Significant time and cost savings on practice staff time and appointments.

Peace Of Mind For Your Clinical Staff

"ExpertCare is fast, accurate, and reliable. It is a game changer."

Sarah Dekmak

Head of Operations

Lead Clinical Pharmacist (IP)

"ExpertCare allows for faster, more confident decisions and saves valuable clinician time. With the time saved, I was able to switch my focus on more complex patients."

Meropi Stamna

Clinical Pharmacist (IP)

"I can confidently say that it has drastically reduced the time required to make clinical decisions in hypertensive patients."

Ihtishaam Hussain

Clinical Pharmacist (IP)

Your Upside

For an average PCN with 50,000 registered patients and 5 GP practices

Using current review methods will cost you an estimated £350,000 over one year to review your approximate 20,000 patients on the 9 QoF CVD prevention domains.

Using our virtual method supported with our medicine optimisation review solution, ExpertCare, is evidenced to reduce your costs by as much as 40% (£140,000)

And, our method shifts the workload away from GPs freeing up valuable time.

All of this for an investment in year one of under £20,000

And ensuring achievement of QoF incentives of approximately £250,000

Call or email us for a demo and free assessment of your PCN
