| 10:50 | Innovator pitches<br>(5 minutes per pitch)                                                                                          | <b>Hassan El-Wakeel</b> – MDColl (Collaboration Digital Ltd)                                                        |
|       |                                                                                                                                     | <b>Jonathan Abraham</b> – Healum                                                                                    |
|       |                                                                                                                                     | <b>Prof Kevin Moore</b> – Salutare ONE Referral                                                                     |
|       |                                                                                                                                     | <b>Dr Jon Turvey</b> – SimFlow.ai                                                                                   |
|       | Overview of the Medicines Safety Improvement Programme and the potential for digital innovations to support pathway wide innovation | <b>Tony Jamieson</b> – Clinical Improvement Lead for Medicines Safety, NHS England                                  |
|       |                                                                                                                                     | <b>Ruth Dales</b> – Senior Improvement Manager for Medicines Safety, NHS England                                    |
|       | Innovator pitches<br>(5 minutes per pitch)                                                                                          | <b>Laura Burrowes</b> – HealthWebsites – Health for Teens, Kids & Under 5s                                          |
|       |                                                                                                                                     | <b>Laura Burrowes</b> – ChatHealth                                                                                  |
|       |                                                                                                                                     | <b>Gosia Kwiatkowska</b> – Rix Wiki                                                                                 |
|       |                                                                                                                                     | <b>Donna Thomas</b> – AboutMi (Here2there.me Limited)                                                               |
|       |                                                                                                                                     | <b>Dr Naveed Iqbal</b> – Medii (Tritone Health)                                                                     |
|       |                                                                                                                                     | <b>Gabriela Matouskova</b> – Hope Programme for LD                                                                  |
| 11:45 | NHS England overview of the Learning Disabilities Landscape                                                                         | <b>Robert Ferris</b> – Regional Programme Director – Learning Disabilities, Autism and SEND, NHS England (Midlands) |
| 11:55 | Support available and next steps<br>Thank you and close                                                                             | <b>Michael Ellis</b>                                                                                                |

## Innovators presenting at this event

### MDColl (Collaboration Digital Ltd)

**Contact:** Hassan El-Wakeel

**Email:** [helwakeel@gmail.com](mailto:helwakeel@gmail.com)

**Website:** [www.mdcoll.com](http://www.mdcoll.com)

MDColl is a system that helps healthcare teams manage their meetings about patient care. It lets team members add patient information, reasons for discussion, results and plans in one shared place before and during meetings, helping staff to prepare faster, keep data up to date, and make better decisions for patient care.

### Multidisciplinary care and support plans (Healum Ltd)

**Contact:** Jonathan Abraham

**Email:** [jonathan@healum.com](mailto:jonathan@healum.com)

**Website:** <https://www.healum.com/>

**LinkedIn:** <https://www.linkedin.com/company/healum/>

Healum provides a digital care management platform and mobile tools that enable shared decision making, coordinated multi-agency care, safe medicines optimisation and access to behavioural and non-pharmacological support. It helps professionals, carers and individuals create and follow personalised care plans that improve outcomes.

### Salutare ONE

**Contact:** Prof. Kevin Moore

**Email:** [kevin@salutare.co.uk](mailto:kevin@salutare.co.uk)

**Website:** <https://www.salutare.co.uk>

**LinkedIn:** <https://www.linkedin.com/company/salutare-group/>

ONE Referral is a cloud based multi-disciplinary team meeting platform which allows clinicians and other specialists to work together to plan optimal patient care. It simplifies and safeguards the referral process by providing a single, reliable pathway for patients to be referred, tracked, and reviewed.

## SimFlow.ai

**Contact:** Dr Jon Turvey

**Email:** [jon@simflow.ai](mailto:jon@simflow.ai)

**Website:** <https://simflow.ai>

**LinkedIn:** <https://uk.linkedin.com/company/simflow-ai>

SimFlow.ai is a remote, AI-powered simulation platform where health and social care staff practice high-risk conversations with lifelike virtual patients, families and colleagues. It provides instant feedback and analytics to build safer, more person-centred communication at scale for people with a learning disability.

## HealthWebsites – Health for Teens, Kids & Under 5s

**Contact:** Laura Serra

**Email:** [laura.serra@nhs.net](mailto:laura.serra@nhs.net)

**Website:** <https://www.healthforteens.co.uk/>  
<https://www.healthforkids.co.uk/>  
<https://healthforunder5s.co.uk/>

**LinkedIn:** <https://www.linkedin.com/company/dhts-nhs>

HealthWebsites are a group of age-appropriate and need-specific health websites offering advice and support. The websites provide expert guidance for parents of babies and young children, fun and interactive content for children aged 5–11 and reliable information for teenagers aged 11–19. A new site focused on neurodiversity and learning disabilities is in development.

## ChatHealth

ChatHealth

**Contact:** Laura Serra

**Email:** [laura.serra@nhs.net](mailto:laura.serra@nhs.net)

**Website:** [www.chathealth.nhs.uk](http://www.chathealth.nhs.uk)

**LinkedIn:**

<https://www.linkedin.com/company/dhts-nhs>

ChatHealth is an NHS-developed messaging platform designed to enable safe, secure and confidential two-way communication between healthcare professionals and service users. It lets people send a message from their phone to NHS staff, get a reply from trained professionals and receive help, advice or support without needing to speak face-to-face.

## Rix Wiki

**Contact:** Gosia Kwiatkowska

**Email:** [g.m.kwiatkowska@uel.ac.uk](mailto:g.m.kwiatkowska@uel.ac.uk)

**Website:** <https://www.rixinclusiveresearch.org/>

Rix Wiki software enables people to create their own personalised and secure websites. They can be used to create multimedia person centred plans that use video, pictures, sound and words to capture the voice, skills, aspirations and needs of the individual. The Rix Wiki has been developed with and for people with learning disabilities, their families, carers, and support professionals.

## AboutMi (Here2there.me Limited)

**Contact:** Donna Thomas

**Email:** [donna@here2there.me.uk](mailto:donna@here2there.me.uk)

**Website:** [www.here2there.me.uk](http://www.here2there.me.uk)

**LinkedIn:**

<https://www.linkedin.com/company/here2there-me/>

AboutMi is a secure digital communication passport (Web App) that stores and shares essential medical, social and environmental information. It gives people with learning disabilities, families and professionals a single, up-to-date, person-centred source of truth to support safe, consistent care across settings.

## Medii (Tritone Health)

**Contact:** Dr Naveed Iqbal

**Email:** [naveed.iqbal3@nhs.net](mailto:naveed.iqbal3@nhs.net)

**Website:** <https://link.mediapp.com/>

**LinkedIn:** <https://www.linkedin.com/company/tritone-health-ltd/>

The Medii App is a digital health app designed for individuals with learning disabilities and autism to help them with their health and wellbeing. Users can record things like sleep, mood or health information on their smartphone or tablet, share it with their NHS care team, and use it as a personal health diary to support better care.

## Hope Programme for LD

**Contact:** Gabriela Matouskova

**Email:** [gabriela@h4c.org.uk](mailto:gabriela@h4c.org.uk)

**Website:** <https://www.h4c.org.uk/>

**LinkedIn:** <https://www.linkedin.com/company/hope4tc/>

The Learning Disability adapted Hope Programme is an in-person, group self-management intervention designed with and for people with learning disabilities. It uses easy-read resources, visual aids, and interactive sessions to support wellbeing, emotional regulation, and shared decision-making, with carers or support workers actively involved.
