

NHS
Providing NHS services

There are three core challenges facing primary care:

1 Lacking capacity to meet patient needs

2 Achieving higher targets on tighter budgets

3 Staff wellbeing and retention

A complete long-term conditions solution

Building resilience in general practice

How we solve this

Suvera's proactive clinic provides a tailored solution to all these challenges by supporting practices with end-to-end long term condition management. Our bespoke tech-enabled workflow combined with specialised clinical team addresses your specific needs quickly, efficiently and effectively.

Pricing

£20 per condition

For hypertension patients, all cholesterol reviews will be included as standard at no extra cost e.g. a patient with HYP+CHOL = £20

Additional Practice Income

Included as standard is our prevalence coding service, **which earns an average 9,000 patient practice an estimated additional £18,000.**

Operational cost savings, maximum QOF achievement and saved appointments with Suvera **immediately frees up staff capacity** and builds practice resilience.

What we offer

Specialised clinicians

All our clinical pharmacists are prescribers, trained in general practice and at managing complex long term conditions.

Flexible capacity

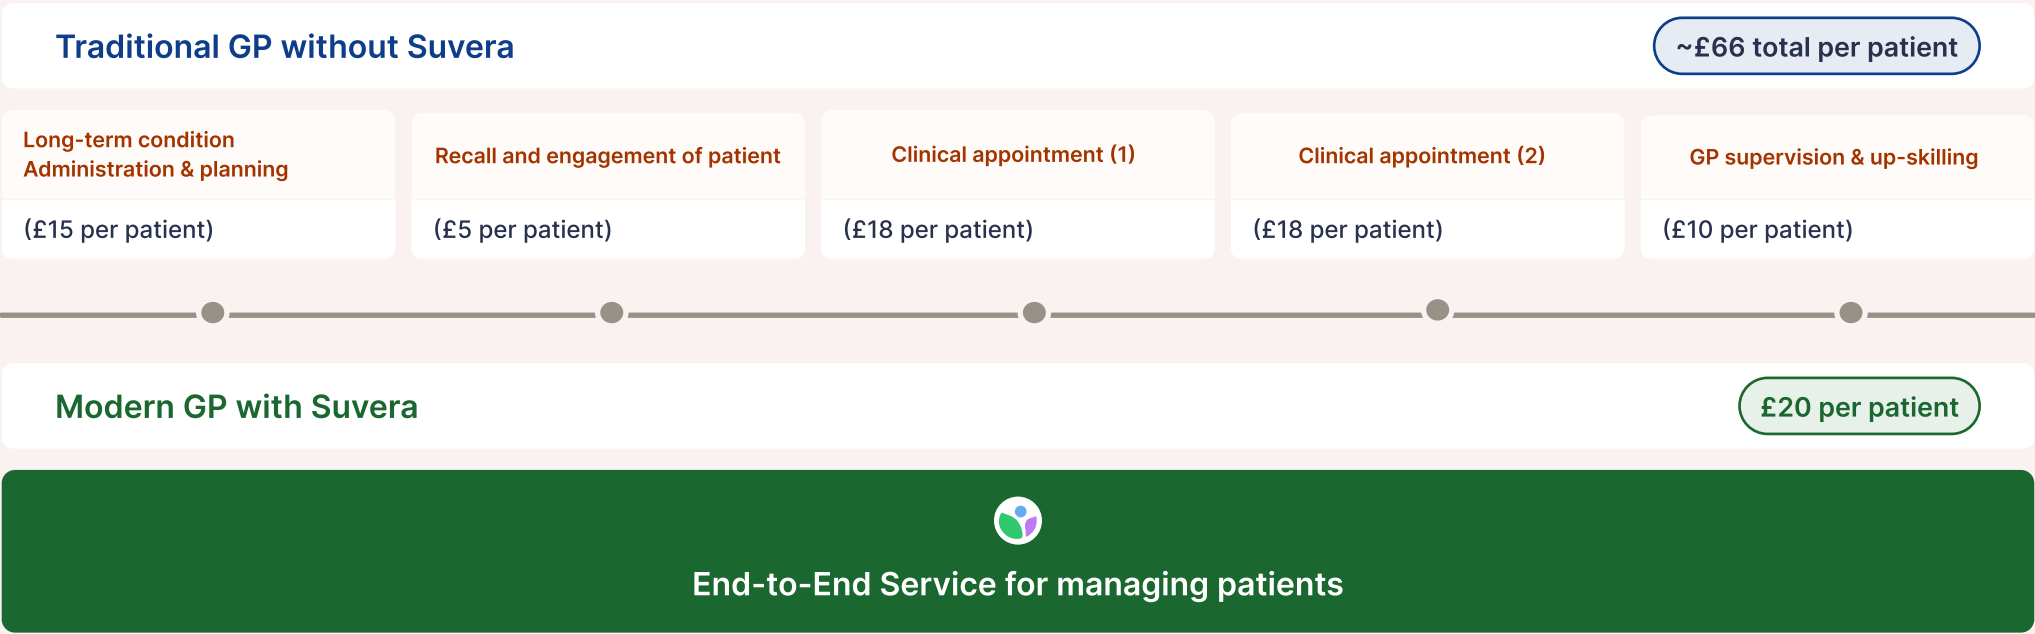

Able to dynamically allocate resource to meet demands of the practice/PCN, with rotating cover for sick and annual leave.

Oversight and management

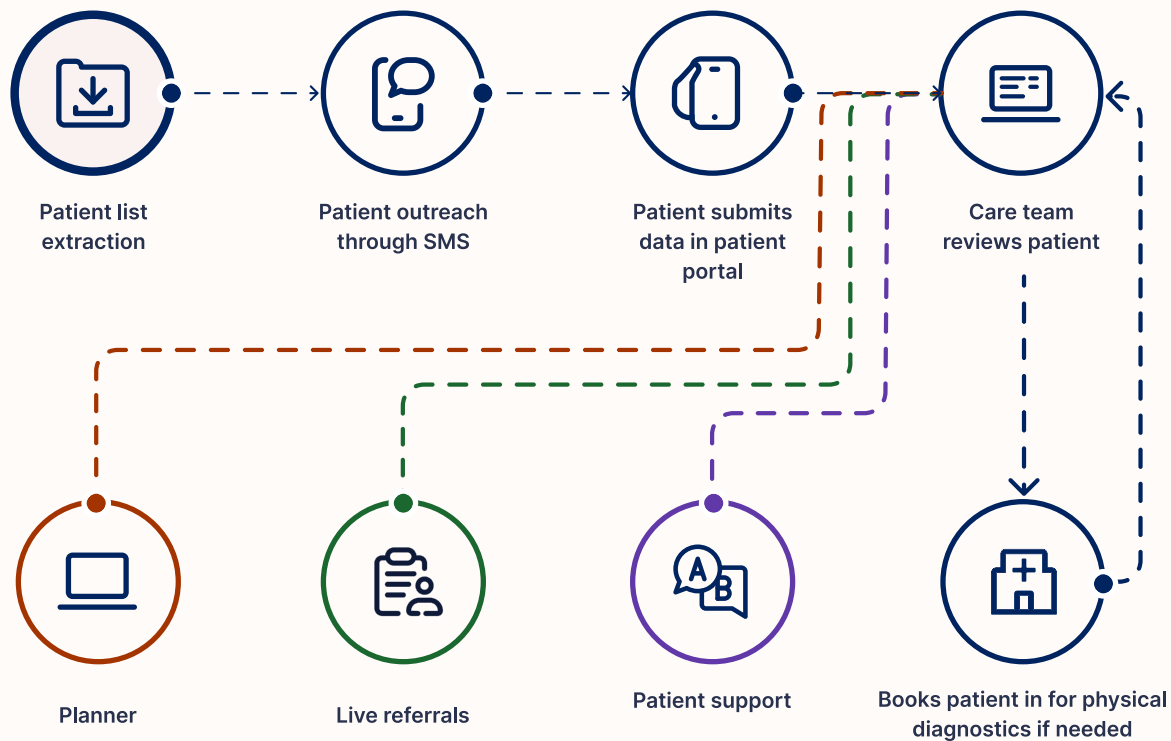

Suvera's GPs provide clinical supervision and management as per our CQQ regulation, to avoid tasking work back to the practice.

How do we compare?

High-level pathway: An integrated workflow

Patient list extraction

Patient lists are directly extracted from the EHR

Data collected upfront from patient

We engage the patient with SMS and phone calls, and collect data from them via the web app

Care team requests diagnostics as needed

Care team also has reminders to review/chase blood tests

Patient support

Patients can get support anytime via the patient web app

Live referrals

For individual patients, we also accept referrals via the Live Refs web app

Planner

You will be able to see all our patient interactions, updates and progress
