“

I have been using Suvera's services for a few years now and have found their innovative methods of helping patients fantastic.

- Dr Akber Ali (PCN Clinical Director)

“

It was a pleasure to work with Suvera clinicians who delivered care plans for our patients with severe frailty.

- Mitesh Shah (Enhanced Services Director)

“

The online clinic is great, and takes the anxiety out of visiting the clinic.

What makes us different?

Dedicated Team

Suvera's clinical pharmacists all have prescribing expertise with extensive general practice experience to deliver truly holistic chronic care. Supported by dedicated analysts and recall specialists, our comprehensive team provides end-to-end condition management.

Bespoke Technology

Suvera's bespoke technology suite ensures comprehensive end-to-end long-term condition management. Seamlessly covering patient coordination and interactions as well as clinician dashboards, Suvera's system integrates with 98% of GP Practices across England.

Fully Regulated

Suvera's GPs provide rigorous clinical supervision and oversight, conducting regular audits in full compliance with CQC regulations. Our robust internal processes ensure patient decisions are covered by Suvera's indemnity. Suvera truly lifts workload burden from GP practice staff.

The process

Enfield South West PCN

PCN List size across 6 practices: 50,000

Before Suvera With Suvera

“They were easy to engage with, understanding our needs and ways of working. The induction process was well organised and easy to follow, and they are extremely responsive to any queries or issues. We are now extending our work with them to cover type 2 diabetic patients and patients with raised cholesterol in high-risk groups/QOF cohorts.

Dr Arjuna Yogaskaran

ICB Digital lead, GP Partner and PCN Clinical Director Enfield South West PCN | North Central London ICB

Patient experience

Suvera aimed to evaluate the acceptability of the service amongst its patients. A survey was sent out to 1000 patients who had opted to use the service.

We had **124** responses.
A response rate of over **10%**.

£20 total per patient

ICB commissioned CVD project

Proactive CVD model by Suvera, improving outcomes in a deprived borough of SEL ICB

The aim was to improve blood pressure targets for the borough of Lewisham, who have historically been one of the most poorly performing boroughs in South East London Integrated Care Board (SEL ICB). The average hypertension achievement has been 55.12%, which is 25% below the national blood pressure ambition of 80%. Suvera was commissioned to manage 5000 patients. See the full report below.
